CAREER SUMMARY

I am a Frontend Developer with profound experience in modern React, Redux, JavaScript, HTML, CSS, Tailwind, Git and webpack. My expertise in website optimization, state management, routing, and component based architecture, responsive layout and Integrating API's highlight my experience and understanding of software development. I have a basic understanding of backend technologies like MongoDB, express, and Nodejs making it easy for me to collaborate with cross-functional teams to define, design, and ship new features.

I take pride in building secured, optimized and reliable web application. I am enthusiastic about code quality, I am eager to learn, and passionate about developing my skills. With a passion to be better and my diligence to work, I push myself to learn continuously and stay afloat of latest technologies to become even more valuable to my team.

EDUCATION

Elizade University, Ilara-Mokin   **Nigeria**
BEng Computer Engineering   July, 2025

Federal University of Technology Akure   **Nigeria**
A levels in engineering   September, 2020

WORK EXPERIENCE

Software Developer Intern   Lagos, Nigeria
Gateway, Nigeria   May 2023 – August 2023
- When I got to gateway, they had a problem with registered users not being active, during a strategy call with the CTO we decided to make a full redesign of the website. I wrote more CSS code than ever, I enjoyed the process. This redesign made the website more user friendly and the user experience got better which in turn led to an increase of active users.

PROJECTS

- **Flixx was built by integrating the interface with TMDB API. The functionalities of the web application allow users to search for movies and TV shows. I was able to fetch and display popular, trending movies and TV shows on the interface. This project was built with JavaScript, Html, CSS, API integration - Flixx app**

- **I built a ready to use webpack boilerplate with major basic configuration to get your project Started. The features include Babel loader, HTMLWebpackPlugin, file loader etc. The GitHub repo contain a descriptive readme on how to get started with incorporating webpack in your project. Simply fork the repo and get started with developing with webpack Webpack starter**

- **Tracalorie is a web application that allow users take charge of their calorie intake, monitor their meals and workout. Users are able to reach a set daily calorie limit by logging their meals and workout. OOP-in-JavaScript, Html, CSS Tracalorie**

- **I participated in a hackathon to create a landing page, registration and contact page that sends the data to a backend server. This project was built with Tailwind css, Html and asynchronous JavaScript – GetLinked**

SKILLS

Technical Skills: HTML, CSS, JavaScript, SCSS, webpack, Git, Responsive Design, Debugging and Troubleshooting, and version control, web development.

Soft Skills: Clear communication skills, Problem solving, result oriented, attention to Detail, advanced analytical skills, adaptability, team player, learning Mindset, Passion for growth.

Fun Activities: Monopoly, Skiing, Reading, Swimming, Lover of Fiction novels, Nature walking, jogging.

AWARDS AND VOLUNTEERISM

Founding member   October, 2022
GDSC community, Elizade

First Place Winner   July, 2023
GDSC coding solution challenge

Volunteer   May 2023 - July 2023
Just project beginner training

Volunteer   Feb 2020 - Dec 2021
War against gender violence

TRAINING AND CERTIFICATIONS

- **Front-end Development Certificate | Ingressive for good | 2022**
- **JavaScript Frameworks Proficiency | Google developer community | 2023**
- **Modern JavaScript From The Beginning 2.0 | Traversy Media**

REFEREE

Available on request.
