CAREER SUMMARY

I am a Software engineer with experience in React, JavaScript, HTML, CSS, Tailwind, Styled components, and Git. My expertise in website optimization, state management, and component based architecture, responsive layout, error handling and Integrating API's highlight my experience and understanding of frontend web development. I am familiar with MongoDB, express, Nodejs and figma making it easy for me to collaborate with cross-functional teams to ship new features.

EDUCATION

Elizade University, Ilara-Mokin   **Nigeria**
BEng Computer Engineering   Nov 2022 -July, 2026

Federal University of Technology Akure   **Nigeria**
A levels in engineering   Sept, 2020 –Oct 2021

WORK EXPERIENCE

Software Developer Intern   Lagos, Nigeria
ATB Tech (Leading company in software development)   March 2024 – Present

- Users could only create one job at a time, which was highly inefficient. After discussing the issue with the senior engineer, we decided to implement bulk upload functionality. I developed three APIs to handle the bulk upload of jobs, categories, and category competencies via Excel files. This new feature streamlined the process, allowing users to create hundreds of jobs at once, significantly reducing manual effort and improving overall efficiency.

PROJECTS

- Engineered a web application, Flixx, to provide vital information on movies, series, and actors. Utilizing the TMDB API for data fetching, I streamlined the user experience by delivering real-time movie recommendations and up-to-date information. Implemented server requests, interface updates, and robust error handling to ensure seamless functionality. Achieved active engagement, with over 10 users regularly receiving movie recommendations on **Flixx**

- Developed a comprehensive Webpack boilerplate, equipped with essential configurations like Babel loader, HTMLWebpackPlugin, and file loader, to expedite project initiation. Authored a detailed README file to guide developers in integrating Webpack bundler into their projects. Facilitated adoption by over 5 developers who have cloned the repository to jumpstart their own projects. **Webpack starter**

- Constructed a full stack calorie-tracking application, Tracalorie, enabling users to log meals and workouts. Executed frontend development using JavaScript, HTML, and CSS, and backend development using Express, with MongoDB for database management. Enhanced expertise in building schemas, creating endpoints, and developing a CRUD application. **Tracalorie**

- Designed and developed a full stack application, RandomIdea, where users can share ideas in a single-interface environment with complex architecture and functionality.   Crafted the frontend with Tailwind, HTML, and JavaScript, while the backend was powered by Express and database on MongoDB.   Achieved a strong user base, with over 15 users actively sharing their ideas on the platform. **RandomIdea**

SKILLS

Technical Skills: Redux, advanced react router, profiling, SCSS, webpack, version control, responsive Design, Debugging, MongoDB, express, Nodejs, UI, react query.

Soft Skills: Clear communication skills, Problem solving, result oriented, attention to Details, advanced analytical skills, fast learner, collaborator, learning Mindset, Passion for growth.

Fun Activities: Monopoly, Skiing, Reading, Swimming, Lover of Fiction novels, Nature walking, jogging.

AWARDS AND VOLUNTEERISM

Founding member   October, 2022
GDSC community, Elizade

First Place Winner   July, 2023
GDSC coding solution challenge

Volunteer   May 2023 - July 2023
Just project beginner training

Volunteer   Feb 2020 - Dec 2021
War against gender violence

TRAINING AND CERTIFICATIONS

- **Frontend development certificate** **Ingressive for good | 2022**
- **JavaScript Frameworks Proficiency** **Google Developer Community | 2023**
- **Modern JavaScript Certificate**   **Traversy Media | 2023**

REFEREE

Available on request.
